STACKED INCOME PROTECTION

UPLAND COTTON - OVERVIEW

The Stacked Income Protection Plan (STAX) is a federally-reinsured insurance policy that provides protection against loss of revenue due to an area level production loss, a price decline, or a combination of both. STAX may be purchased as a stand-alone policy or as a companion policy to an individual (YP) or revenue (RP, RP-HPE, ARPI or WFRP) plan of insurance. Producers may choose from a variety of coverage levels and protection factors to personalize their policy. An indemnity is based on the expected crop value for the area. Amount of coverage will depend on the expected yield, projected price, coverage range and protection factor.

Sales Closing

An addendum to the MPCl application must be completed and signed no later than the applicable sales closing date.

If purchased as a companion policy, STAX must be applied for with the same insurance company as the underlying plan of insurance.

STAX is a continuous policy that covers planted acreage of the crop. Insurance attaches annually when planting begins.

Coverage Limitations

- Available for Upland Cotton only
- Ends at 70% of expected revenue and cannot overlap coverage from a companion policy
- Cannot have STAX and Supplemental Coverage Option on same cotton acres
- No prevented planting, late planting or replanting coverage available

RMA Program Reminders

- STAX allows producers to elect a zero percent coverage range by practice
- Written Agreements are allowed for new breaking, unrated insurance option, strip-mined land, unrated P/T, unrated land or county without actuarial information available
- STAX coverage is available for cottonseed through an optional endorsement, which will provide yield-only coverage at the same coverage range and protection factor as the underlying STAX.

PREMIUM SUBSIDY

80% (for all plan types and area loss triggers)

COVERAGE LEVELS

Between 70% and 90%
(in 5% increments)

PROTECTION FACTORS

Between 80% and 120%
(in 1% increments)

By the Numbers

PREMIUM			WHAT IF?

* To create premium estimate scenarios as shown above, utilize the “Estimator” tool in Hudson’s eHarvest™ processing system.

LOSS/INDEMNITY			WHAT IF?	
An indemnity is calculated following the release of Final Area Yields by the FCIC, typically the summer of the subsequent year. If an indemnity is due for STAX, the loss will be paid within 30 days following the release of the Final Area Yield.				
PLAN	STAX-RP	STAX-RPHPE		
SHARE	100%	100%		
ACRES	100	100		
DISCOVERY PRICE	\$ 0.74	\$ 0.74		
EXPECTED YIELD	724 LBS	724 LBS
