

RAINFALL INDEX - PRF

PASTURE, RANGELAND AND FORAGE - OVERVIEW

Rainfall Index - Pasture, Rangeland and Forage (RI-PRF) is a federally-reinsured product that provides protection against a single peril - lack of precipitation. Coverage can be purchased by landlords, tenants and owner/operators for those acres important to their haying or grazing operation. Producers may select from a variety of coverage levels, productivity factors and two-month index intervals to personalize their plan. The Rainfall Index program uses weather data collected by the National Oceanic and Atmospheric Administration to determine rainfall levels. When the final grid index falls below your trigger grid index, you may receive an indemnity.

Recent Changes

- FSA-578s may be used in conjunction with other documentation in determining shares.
- Veteran Farmer or Rancher (VFR) includes qualifying veteran with non-veteran spouse
- Producers can report acreage as certified organic, or as in transition to certified organic, if requested by acreage reporting date.
- Producer is responsible for starting dispute resolution through arbitration when disagreeing with AIPs determination.
- Previously, the Farm/Tract/Field, CLU, RLU and "etc." were allowed. "Etc." has been removed, meaning that BLM is no longer an option. In cases where a Farm/Tract/Field or CLU are not available, an RLU will be required. Luckily, Hudson's eHarvest system makes RLUs a cinch!
- Failure to provide documentation when requested by Hudson for acreage inspection, verification of points of reference (POR) and/or to verify Application/Acreage Report content, will result in no indemnity being due, but premium is still owed.
- Clarified that a separate point of reference is required for all non-contiguous acreage.

Coverage

- RI-PRF may cover all or a portion of the insured's acreage, providing flexibility when deciding how to cover their specific risk.
- Plan uses long-term, historical, gridded precipitation data for the grid ID and index interval.
- Each grid and index interval are rated individually, providing options for the producer. The size of each grid translates to approximately 17 miles by 17 miles.
- You cannot insure overlapping intervals.
- The program is an area insurance plan and does not measure, capture or use any actual crop production. The producer's amount of production is not considered, and no on-the-ground inspection of crop condition is conducted to determine eligibility for an indemnity payment.

AVAILABILITY

RI-PRF is available in the 48 contiguous states, as well as those U.S. acres located in a grid that crosses the U.S. border or along the ocean in the closest grid ID.

COVERAGE LEVELS

Between 70% and 90%
(in 5% increments)

PRODUCTIVITY FACTORS

Between 60% and 150%
(in 1% increments)

IMPORTANT DATES (2023 CY)

- Contract Change Date: 8/31/22
- Sales Closing, Cancellation and Colony Reporting Date: 12/01/22
- Premium Billing: 9/1/23
- End of Insurance: 12/31/23

* To create premium estimate scenarios as shown above, utilize the "Estimator" tool in Hudson's eHarvest™ processing system.

* If the Final GRID index value is less than the coverage level, then:

$$\text{Payment Factor} = (\text{Coverage Level} - \text{Final GRID Index value}) / \text{Coverage Level}$$

* Indemnity = Dollar Amount of Protection for the Interval x Interval Payment Factor

NON DISCRIMINATION STATEMENT: Hudson Insurance Company is an equal opportunity provider. In accordance with Federal law and U.S. Department of Agriculture (USDA) civil rights regulations and policies, the USDA, its Agencies, offices, and employees, and institutions participating in or administering USDA programs are prohibited from discriminating on the basis of race, color, national origin, religion, sex, gender identity (including gender expression), sexual orientation, disability, age, marital status, family/parental status, income derived from a public assistance program, political beliefs, or reprisal or retaliation for prior civil rights activity, in any program or activity conducted or funded by USDA (not all bases apply to all programs).
